## SUMMARY

DevOps Engineer with 5 years of experience specializing in CI/CD automation, AWS cloud services, containerized application deployments, Kubernetes workloads, and Terraform-based infrastructure provisioning. Strong background in optimizing deployment workflows, troubleshooting environment issues, and collaborating with development teams to ensure stable and reliable releases. Skilled in Jenkins, GitHub Actions, Docker, Kubernetes (application-level), Terraform, and AWS (EC2, S3, IAM, VPC).

## EXPERIENCE

### Mphasis

Jan. 2025 – Dec. 2025

#### DevOps Engineer

Pune, India

- Maintained CI/CD pipelines in GitHub Actions and Jenkins for automated build, test, and deployment workflows.
- Provisioned and configured AWS resources such as EC2, S3, IAM roles/policies, and VPC networking components.
- Authored Dockerfiles, built/pushed container images, and supported developers with containerization onboarding.
- Deployed applications to Kubernetes using deployments, services, and config maps; analyzed pod logs for issues.
- Set up CloudWatch alarms and created lightweight Grafana dashboards for performance monitoring.
- Assisted with production release cycles and resolved environment-related issues in coordination with development teams.

### IBM

June 2021 – Jan. 2025

#### DevOps Engineer

Pune, India

- Built and enhanced CI/CD pipelines in Jenkins and GitHub Actions to streamline deployment processes.
- Automated repetitive deployment and validation tasks using Bash scripts.
- Managed AWS cloud resources including EC2 provisioning, S3 storage, IAM access management, and VPC components.
- Wrote Terraform configurations to provision EC2, S3, and IAM resources; executed apply/destroy lifecycle operations.
- Deployed applications to Kubernetes environments and performed rollout, rollback, and pod-level debugging.
- Created monitoring dashboards in Grafana and configured CloudWatch alarms for system health checks.
- Collaborated with engineering teams to troubleshoot build failures and deployment pipeline issues.

### SpiceWorks Ziff Davis

2018 – 2021

#### Social Media Specialist

Pune, India

- Managed routine social media posts and basic content updates for marketing campaigns.
- Assisted with simple CMS-based content uploads and coordination with the creative team.

## SKILLS

**DevOps Tools:** Jenkins, GitHub Actions, Git, Docker, Kubernetes (Deployments/Services)

**Cloud:** AWS (EC2, S3, IAM, VPC, CloudWatch)

**Infrastructure as Code:** Terraform (EC2, S3, IAM provisioning)

**Monitoring:** Grafana, CloudWatch Alarms

## EDUCATION

### Bachelor's Degree

Electronics and Telecommunication Engineering

2016

Pune University
